BOAT WORLD EVOLUTION

The Dynamic Trim Control System Series E is an evolved version of the successful Series S that incorporates a state-of-the-art family of large durable, fast-acting Interceptors perfectly engineered for bigger boats, from 50-100 ft. Unique 3D controls with a large display provide the helmsman with unmatched, user-friendly, intuitive and precise control of running trim, heel or heading. The system is fully automatic and significantly enhances the boat's performance, fuel economy, comfort and safety.

KEY FEATURES

- **COMFORT AND SAFETY**
Dynamically eliminates uncomfortable and dangerous boat pitch and roll.
- **PERFORMANCE AND FUEL ECONOMY**
Automatically minimizes wave resistance and saves fuel.
- **INTUITIVE AND PRECISE CONTROL**
Innovative 3D controls provide unmatched control of running trim, heel or heading.
- **DURABLE AND EFFECTIVE**
Patented series of large, durable fast-acting interceptors provide supreme lift force characteristics.
- **COMPLETE AND COMPETITIVE**
All-inclusive mass-produced modular design provides built-in quality, simple installation and easy expansion, while making the system affordable.
- **EXTERNAL MONITORING AND SYSTEM CONTROL**
The system can be monitored and/or controlled from external devices, e.g. multifunction displays or plotters via its NMEA 2000® interface.
- **CONFIGURABLE LIFT FORCE ALLOCATION**
The Series E system allows customized allocation of control forces by setting active or inactive control of pitch, roll and yaw for each pair of port and starboard interceptors. A pair's function may also be swapped e.g. to mitigate roll-induced steering forces from another interceptor pair or pairs.

CHINE INTERCEPTORS

TUNNEL-SHAPED INTERCEPTORS

INTERCEPTORS VS TRIM TABS

Series E is a family of large, fast-acting interceptors that includes three straight, three tunnel and two chine models. Their blade rate and stroke are 40 mm/s and 60 mm respectively. This means plenty of lift force without delay, outperforming conventional trim tabs' control rate by a factor of 10.

When arranged to fully or near fully use the otherwise unutilized part of the beam for lift generation, the Series E interceptors are much more efficient at creating lift compared to narrow-span trim tabs.

The large, modular design made for mass production means the interceptors are durable, affordable and particularly well adapted to any planing or semi-planing boat between 50-100 ft.

CHINE INTERCEPTORS FOR MAXIMUM LIFT

Chine interceptors provide a unique means of maximizing pitch and roll motion control by utilizing the furthest outboard surfaces of the hull bottom for lift generation and roll reduction.

As a rule, the lift effect of a chine interceptor matches the lift of a straight interceptor one size larger mounted inboard of the chine, making them the go-to choice when selecting interceptors.

TUNNEL INTERCEPTORS FOR MOUNTING ABOVE PROPELLER TUNNELS

Tunnel-shaped interceptors provide the perfect lift-force solution for hulls with propeller tunnels. In contrast to straight interceptors, the tunnel interceptor's constant radius curvature allows mounting above the propeller tunnel to fully or partially use the otherwise unutilized part of the beam for lift generation.

The three tunnel models with different radii, R500, R600 and R800, make sure that most large boat propeller tunnels can be covered with negligible deviation between hull and interceptor curvature.

All interceptor models can be included in new installations, or retro-fitted to systems already installed.

CONTROL PANEL

Model	CP-E
Weight	0.22 kg
Mounting	Flush or surface
Supply Voltage	12-32 V DC
Power Consumption	10 W max
Waterproof Rating	IP67/IP64 (front/back)
Operating Temperature	-20° to +85°C (-4° to +185°F)

FEATURES

- Fully automatic
 - Dynamic pitch and roll control
 - Steering and turn enhancement
- Built-in GPS and motion sensors
- Unique and intuitive 3D controls
- Sunlight readable color display
- Instant state user feedback
- Auto power on/off via ignition key sense
- Full range of electrical interfaces
- Waterproof
- Auto dimming / night mode
- Upgradable via USB stick
- Up to four control panels in the system
- Surface, flush or gimbal bracket mount
- Manages installation configurations from 1 up to 6 Series E or any mix with Series S interceptors
- Allows configuration of interceptor pair function
- Auto Cleaning
 - Selectable periodic cleaning cycle
 - Prevents fouling inside the interceptor
- Monitored and/or controlled from external devices, e.g. multifunction displays or plotters via its NMEA 2000 interface
